Education

Aston University, Birmingham, UK

Expected Jan 2027

MSc Data Science and Artificial Intelligence

Relevant Coursework: Artificial Intelligence, Machine Learning, Algorithms for Data Science, Neural Networks, Theory and Practice of Software Engineering

Dr. Babasaheb Ambedkar Marathwada University, Aurangabad

May 2017

B.E. in Mechanical Engineering

GPA: 3.63/4.00

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, Java, MySQL, MongoDB, Node.js, React, HTML, CSS, PowerShell, C++, PostgreSQL, PHP, WordPress

Frameworks & Libraries: Angular, Tailwind, Karma Jasmine, Playwright, GraphQL, ExpressJS

Tools & Platforms: Azure, Docker, Jenkins, Jira, GitHub, Confluence, DevTools, DevOps, CI/CD, Excel

Professional Experience

Lead Engineer — Nitor Infotech, India

Feb 2025 – Dec 2025

- Architected Angular-based e-commerce platforms, improving UI performance and reducing load time by **30%**.
- Led micro frontend architecture integrating **5+ services**, enabling scalable and independent deployments across product, payments, and user domains.
- Implemented advanced search, filtering, and NgRx-based state management across **50+ pages**, improving product discoverability and navigation consistency.
- Developed analytics dashboards used by **1000+ users** to monitor sales, inventory, and user behavior.
- Mentored a team of **6 developers** and facilitated Agile ceremonies as Scrum Master, ensuring consistent sprint delivery.

Senior Software Developer — Eastern Enterprise, India

Oct 2021 – Dec 2024

- Led a team of **4 developers** to build a customizable UI-driven architecture with integrated access control for Microsoft APIs, enabling secure multi-tenant workflows.
- Redesigned database schemas to simplify complex queries and improve overall system performance by **30%**.
- Optimized application performance using client-side pagination and server-side caching, reducing data transfer size and improving front-end load times by up to **70%**.
- Developed **25+ Angular UI screens**, streamlining onboarding and offboarding workflows and reducing enrollment time by **30%**.
- Built an observability data grid platform with real-time monitoring, supporting **5000+ devices** and improving system visibility.

Senior Systems Engineer — Infosys Ltd, India

Jan 2019 – Oct 2021

- Built Angular-based incident management dashboards supporting **multiple services** and cross-team monitoring workflows.
- Developed real-time data visualizations handling **1000+ daily events**, enabling faster issue detection and response.
- Collaborated with cross-functional teams across regions to deliver features and resolve production issues within defined SLAs.

Software Developer — Upturn Precision Industries, India

Jul 2017 – Dec 2018

- Improved UI performance and responsiveness by optimizing component rendering and implementing lazy loading, reducing rendering issues by **25%**.
- Collaborated with cross-functional teams to ensure consistent and high-quality product delivery.

Projects

Travel Booking & Recommendation System

Jan 2019 – Apr 2019

- Built a travel booking platform with personalized recommendations based on user preferences and booking history, improving booking experience and user engagement by **15%**.
- Developed a full-stack application using Angular, Node.js, and MongoDB, supporting **1000+ users**.
- Implemented tracking and analytics using user activity logs and booking patterns to monitor usage and optimize feature performance.

Smart Remote-Controlled Mobility System for Campus Transportation

Dec 2016 – Feb 2017

- Developed a remote-control roller-skate mobility system to improve campus transportation, cutting the walking time from **25 minutes to 8 minutes**.
- Integrated **PS3** remote-control functionality for smooth navigation and responsiveness.
